SUMMARY

Demonstrated ability to confidently lead diverse teams in all aspects of software projects with exceptional results. Extensive experience in managing small to medium complexity Java/J2EE projects, mostly in banking domain. Known as a diligent leader with ability to interact well with clients and other stakeholders. Comprehensive experience in requirement gathering and efficiently translating business requirements into functional technology designs.

EXPERIENCE

Oracle India Pvt Ltd, Hyderabad

since May 10

Senior Applications Developer

Worked with client to gather, categorize and prioritize business requirements. Created software designs for different requirements and created Proof of Concept applications for a couple of technically challenging aspects. Helped team members learn new technologies being used in the project and motivated them to look for open source tools relevant to requirements.
